

## **Adriana Casas**

Adriana Casas is a lawyer from Universidad de los Andes in Colombia and has a Masters in Environmental Management from Yale University. Ms Casas has more than six years of experience working on environmental law and policy issues in developing countries, particularly as an environmental law adviser and preparing policy reports and analytical documents related to biodiversity conservation, sustainable use and distribution of benefits. She has coordinated collaboration groups among agencies, as well as regulatory processes; she has also trained local communities and studies on policy and regulatory tools for biodiversity.

Some of her publications include: (1) Casas, A. (2002) Conservación en Panamá -Análisis del Marco Legal para la conservación en tierras privadas en Panamá (Analysis of the legal framework for conservation in private lands in Panamá.) The Nature Conservancy and United States Agency for International Development, PG.1-133. Ciudad de Panamá, Republica de Panamá; (2) Carrizosa S, Casas A (2000) La bioprospección y el acceso a los recursos genéticos -Guía práctica al régimen Andino de acceso a recursos genéticos y conocimiento tradicional sobre la biodiversidad (Guide to the Andean regime on access to genetic resources and traditional knowledge of biodiversity), (ED.) Corporación Autónoma Regional de Cundinamarca, PG.1-159. Bogotá, Colombia; y (3) Casas, A. (1999) Recursos Genéticos, Biodiversidad y Derecho (Genetic Resources, Biodiversity and the Law), Ediciones Jurídicas Ibáñez e Instituto Colombiano de Derecho Ambiental PG.1-252. Bogotá Colombia.
