⁽¹⁾ **Timeframe** refers to best estimate for completion. For some recommendations this could require a year or more. If a longer timeframe is foreseen, please provide an estimate.

⁽²⁾ This space is intended to permit a full account in cases of greater complexity or where the country believes a more detailed description would be justified or be useful to others facing similar conditions.

⁽³⁾ As used here **substantial** could refer to whatever obstacle materially impeded the implementation. It refers to whatever the country believes constituted this condition, whether or not the recommendation is reported as completely implemented.

⁽⁴⁾ This is provided so that countries, where national resources are inadequate, can specify what assistance may be needed: technical or material.

⁽⁵⁾ Beyond the information already provided, this area enables the responding country to include information of any kind which it considers essential to understanding the response to the recommendation.
