# Objective and Background

---

## Objective

To develop a technological tool that provides investigators in member countries timely access (online) to relevant public information (about citizens and non-resident or foreign companies), openly available in web pages, within the framework of the analysis of ML/TF and related cases.

## Background

- **Idea**: XL Meeting of the Expert Group for the Control of Money Laundering, held on May 19 and 20, 2015, in Washington.
- **Approval**. XLI Meeting of the Group of Experts for the Control of Money Laundering, held on October 1 and 2, 2015, in Lima, Peru.
- **Validation**. Fifty-eighth regular session of CICAD, held in Trujillo, Peru, from November 11 to 13.

# ¿Why this Project is important?

---

All LA/FT investigation requires collecting information from websites (national or foreign) on people, companies, patrimonial, commercial, professional, criminal information, among others.

Finding a website that offers useful information takes investigators a significant amount of time.

This search time would be significantly avoided if there were direct access to the specific Internet pages to the LA/FT cases.

This project aims to address the need for access to information from member countries, through the collection of different web pages relevant on LA/FT investigations.

The use of this tool allows to optimize the search time, and provides access to timely and accurate information.

---

## Goal of the GELAVEX Virtual Campus

---

To implement the project "OPEN SOURCES", publishing the open sources that have been provided by the different countries, within the necessary security parameters, and providing a space to share knowledge.
