

APPROVAL OF THE CREATION OF A TECHNICAL NOTEBOOK ON THE ECONOMIC ASPECTS OF UNIVERSAL SERVICE

The VI Meeting of the Permanent Consultative Committee I: Telecommunication Standardization

CONSIDERING:

- a) That Resolution PCC.I/RES.38 (III-03) approved the preparation of a study on the economic aspects of universal service to be developed by the Working Group on Economic Aspects and Tariff Principles; and
- b) That during the current meeting of PCC.I, the results of the study mandated were presented so as to prepare final considerations, exactly as defined in the corresponding work plan,

RECOGNIZING:

That the technological advances in the telecommunication sector broaden the universe of services, applications and technologies, resulting in elements to be taken into consideration for the implementation of universal services in our countries.

RESOLVES:

- 1. To approve the creation of a Technical Notebook of the PCC.I, on the Economic Aspects of Universal Service, using PCC.I-TEL/doc.594/05rev2 as an initial document.
- 2. To instruct the Administration of Mexico, as coordinator of the above-mentioned study, to coordinate the update of the Technical Notebook indicated in *resolve* 1.
- 3. To publish this document on the Internet website of CITEL.
