

COM/CITEL/RES. 267 (XXXI-15)¹

ELABORATION OF A NEW RESOLUTION FOR THE DEVELOPMENT OF NEW PROCEDURES FOR THE ELABORATION, DISCUSSION, ADOPTION AND PRESENTATION OF INTER-AMERICAN PROPOSALS (IAPs) TO THE ITU

The 31 Meeting of the Permanent Executive Committee of CITEL, COM/CITEL,

CONSIDERING:

- a) The substantial work undertaken by the Ad Hoc Group for the development of new procedures for the elaboration, discussion, adoption and presentation of Inter-American Proposals (IAPs) to ITU Conferences and Assemblies.
- b) That the Ad Hoc Group requires additional work and consultations in order to present a final draft version of the said resolution to the 32 Meeting of COM/CITEL in 2016.
- c) That the 31 Meeting of COM/CITEL recognizes that the existing procedures and guidelines for the elaboration, discussion, adoption and presentation of IAPs for the WTSA, WTDC, and WCIT remain the purview of PCC.I, while IAPs for WRC remain the purview of PCC.II.
- d) That the existing procedures and guidelines for the elaboration, discussion, adoption and presentation of IAPs for WRC do not include procedures for the Radiocommunication Assemblies (RA).

RESOLVES:

- 1. To request the Ad Hoc Group to continue working on the elaboration of a new resolution for the development of new procedures for the elaboration, discussion, adoption and presentation of Inter-American Proposals (IAPs) to the ITU.
- 2. To request the Ad Hoc Group to conduct a series of teleconferences between January and October 2016 to finalize the work, and keep COM/CITEL duly informed.
- 3. To instruct PCC.II to adopt procedures and guidelines for the elaboration, discussion, and submission of IAPs for the ITU Radiocommunication Assemblies (RA). In the event that no such procedures are adopted by the PCC.II before the next RA, the existing procedures for WRC will apply.
- 4. To instruct the CITEL Secretariat to provide the Ad Hoc group with the support required, and inform the PCCs on the adoption of this Resolution.
