

**PCC.II/DEC.4 (II-96)**

Member countries present at the Second Meeting of the Permanent Consultative Committee II agreed that it would be very useful to have a handbook on Broadcasting Satellites.

Accordingly, the meeting decided to support the preparation of the ITU-R Handbook on Broadcasting Satellite Systems and Technology now under consideration by a Special Rapporteur Group of ITU-R Working Party 10-11S, with a view to publication in the 1997-1998 timeframe.

The Executive Secretary will inform the ITU about this decision prior to October 1996.
