

PCC.II/RES. 29 (V-99)¹

Common Views of CITEI on Terrestrial Broadcasting Issues

The Fifth meeting of the Permanent Consultative Committee II: Broadcasting,

CONSIDERING:

That only a few CITEI Member States participate in meetings and activities developed at ITU-R Study Groups 10 and 11, and its corresponding Working Groups;

RECOGNIZING:

- (a) That at ITU-R related meetings and Conferences dealing with terrestrial broadcasting issues, CITEI Member States generally present their positions individually, resulting in less than full support for their proposals;
- (b) That it is important for CITEI Member States to adopt a common approach on sound and television broadcasting; and
- (c) That in order to achieve this purpose, it is also required that rapporteurs act as a liaison to provide information to CITEI Administrations, in order to assure feedback on the group's work, and finally prepare common proposals for further submittal to different fora.

RESOLVES:

1. To encourage CITEI Member States to actively participate in the work of the ITU in the area of broadcasting.
2. To request those CITEI Member States that are able to participate in ITU meetings, to inform subsequent PCC.II meetings about the status of work developed.
3. To urge CITEI Member States to develop, where possible, common proposals on terrestrial broadcasting that would be presented in other fora, such as the ITU-R.
